

An opportunity has arisen for a Quality Technician to join the quality assurance team within The Ashton Group.

THE GROUP

A leading distributor of sealing solutions to varied sectors and manufacturer of gaskets and plastic packaging. Part of a 140 year old privately owned group of companies.

Group Quality Technician

The Quality Technician Role

The Quality Technician will perform the following duties:

- Perform inspections and tests on incoming material, ensure that quality standards are met. Where necessary, have communication with both suppliers and customers to ensure product specifications are understood.
- Support quality, Sales and manufacturing as needed.
- Conduct internal audits to maintain current standards and identify areas for improvement.
- Conduct technical investigations into supplier or manufacturing defects/failures and customer complaints.
- Recommending and actioning appropriate containment and corrective actions.
- Generate appropriate documentation, records and reports.
- Control the calibration of equipment and measuring devices either by internal calibration or arrangement of outsourced calibration companies.
- Manage and report on the supplier rating system.

The Quality Technician Candidate

The ideal Quality Technician candidate will be able to demonstrate:

- Experience of working in a Quality department would be beneficial but is not an essential requirement.
- Experience using manufacturing measurement equipment.
- Be able to read technical drawings.
- Excellent communication skills both verbal and written.
- A high level of attention to detail.
- IT literacy (competent user of Microsoft packages).

Hours of work: Monday - Friday. 4 hours per day. Actual working times to be agreed with the suitable candidate.

Competitive salary.

Private Parking
